

PLT OPC Importer for Wyseboard Cloud Manufacturer-independent visualization software

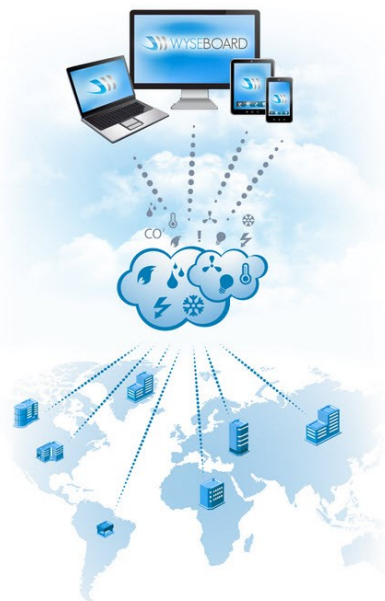

The PLT OPC Importer is an interface to interact between Systems with and without OPC support. The basic structure of the PLT OPC Importer can be modified to your system. As example

Wyseboard is an application that allows you to collect and visualize technical data of any type of machine or equipment in a unique – cloud-based platform

Technical data may be:

- energy consumption,
- air quality,
- water consumption,
- motion detector,
- alarm messages,
- counters and sensors,

Absolute security

A point-to-point communication with the Cloud Platform only happens on demand. Wyseboard uses only data that has been sent by devices and data points to the platform. This way, a direct interference in complex security systems is avoided.

Security settings:

- OPC Tunneling
- HTTPS
